

HYDROGEOLOGIST III Position #19867

The New Hampshire Department of Environmental Services, Waste Management Division, Hazardous Waste Remediation Bureau has an immediate opening for a full-time Hydrogeologist III. *The ideal candidate should* be able to provide high level hydrogeological and regulatory expertise and experience to review and approve hydrogeological investigations and the design and implementation of remedial action plans by responsible parties for contaminated sites. Brownfields-related work experience a plus.

Minimum requirements for this position is a bachelor's degree with a major study in geology, hydrogeology or a related water resources or earth science degree and six years' experience as a professional geologist, hydrogeologist, or hydrologist. Each additional year of approved formal education may be substituted for one year of required work experience.

License/Certification: Must have, or obtain within one year of hire, registration as a Professional Geologist in the State of New Hampshire. Must possess a valid driver's license to perform professional field work.

The selected applicant must satisfy the Occupational Safety and Health Agency's health and safety requirements for employees who work at hazardous waste sites including periodic medical monitoring and adherence with personnel protection procedures.

The salary range for this position is \$51,772.50 - \$61,483.50. Three additional steps may be awarded based on successful performance evaluations. The selected candidate must satisfactorily pass criminal background and motor vehicle checks and will have to pay a union/agency fee at a future date. For further information on the responsibilities for this position, contact Karlee Kenison, Hrdrogeologist V, at (603) 271-6544 or e-mail at: Karlee.Kenison@des.nh.gov.
